

Diesel Engine Fuel Injection Nozzle DN0SD304

This fuel injection nozzle is engineered for optimal fuel atomization and combustion efficiency in diesel engines. It is constructed with durable materials to withstand high pressure and temperature conditions.

Product Overview

High-Precision Diesel Fuel Injection Nozzle

This fuel injection nozzle is engineered for multi-cylinder diesel engine fuel systems, focusing on optimal fuel atomization and combustion efficiency. Constructed from durable steel, it is designed to withstand high-pressure and high-temperature operating conditions to ensure consistent performance. This component supports precise fuel delivery, contributing to improved engine reliability and reduced emissions.

Technical Specifications

Body Material	Steel
Weight	0.04 kg
Carburettor Type	Downdraft
Compatible Fuel	Diesel
Stroke	Standard

Compliance & Quality

Quality Certifications	ISO9001, TS16949
Warranty Period	6 Months
HS Code	84099199

Cross-Reference Data

Compatible Nozzle References
