

Diesel Engine Fuel Injection Nozzle

This fuel injection nozzle is designed for diesel engines. It ensures optimal fuel atomization and delivery, which contributes to efficient combustion and reduced emissions.

Product Overview

High-Precision Diesel Injection Nozzle

This diesel engine fuel injection nozzle is engineered for optimal fuel atomization and delivery, ensuring efficient combustion and improved engine performance. Designed for durability and consistent operation, it is a critical component for maintaining engine efficiency and reducing emissions. Manufactured to meet rigorous quality control standards, this part is suitable for various multi-cylinder diesel engine applications.

Technical Specifications

Body Material	Steel
Cylinder Compatibility	Multi-cylinder
Fuel Type	Diesel
Weight	0.04 kg
Carburettor Type	Downdraft

Certifications & Standards

Certifications	ISO9001, TS16949
Warranty Period	6 Months

Compatibility Reference
