

Diesel Engine Fuel Injection System

This diesel injection system ensures efficient fuel delivery for optimal engine performance. It is designed for reliable operation and enhanced combustion.

Product Overview

High-Performance Fuel Injection System

This diesel injection system is engineered for precision fuel delivery in heavy-duty engines. Designed for 4-stroke operation, it ensures efficient combustion, which helps optimize engine output and improve fuel economy. Built with durable materials like Gcr15, this component is designed to meet rigorous standards for reliability and long-term performance in demanding industrial environments.

Technical Specifications

Model Number	131151-6220
Engine Type	4 Stroke
Fuel Type	Diesel
Material	Gcr15
Body Material	Aluminium
Diameter	12 mm
Cylinder Configuration	Multi-cylinder
Carburettor Type	Downdraft

Certifications & Quality

Certifications	ISO9001
----------------	---------

Compatibility

Compatible Engine Models

- 6D15
- 6HAL
- TD42
- HD700
- 6BD1
- SD33
- 4BD1
- 4BD1T
- EX200-2
- HINO
- C240
- 4BC2
- 6D105
- S6D105
- PC200-3
- TOYOTA DL
- 2J
- B
