

Diesel Engine Fuel Injector

This fuel injector is designed for modern diesel engines, ensuring precise fuel delivery and optimizing combustion efficiency. It is engineered with durable materials for an extended lifespan and reliable operation.

Product Overview

High-Performance Diesel Fuel Injector

This diesel engine fuel injector is engineered for precision fuel delivery in modern common rail systems. Designed to optimize combustion efficiency, it helps improve overall engine performance and fuel economy while actively reducing environmental emissions. Built with durable materials, this component is crafted to ensure a long service life and reliable operation even under demanding engine conditions.

Technical Details

System Compatibility

Common Rail

Part Number

095000-6491

Performance Features

Key Benefits

- Optimized combustion efficiency
- Improved fuel economy
- Reduced emissions
- High durability for extended lifespan
