

Diesel Engine Generator Set

This diesel engine generator set is designed for demanding applications, providing a stable and consistent power supply. Enclosed in a rugged steel frame, it incorporates advanced control systems for optimal performance and safe operation.

Overview

High-Performance Diesel Power Generation

This industrial diesel generator set offers reliable power coverage ranging from 20KW to 1700KW. Engineered for durability and efficiency, the unit incorporates advanced engine technology to ensure consistent performance in demanding mechanical and marine applications. Designed for ease of use, it features integrated control systems, low noise output, and a robust build for long-term service.

Technical Specifications

Power Output Range

20 KW

Minimum Power

1700 KW

Maximum Power

Operational Noise Level	85 db
Noise Measured At	7 meters

Features

Standard Integrated Components

- Vibration absorbers
- Integrated base fuel tank
- Muffler system
- Internal starting battery

Performance Characteristics	Low Vibration, Low Noise, High Reliability, Compact Design, Lightweight
------------------------------------	---

Operations

Control System Capabilities

- Easy operation interface
- Comprehensive monitoring functions
- Reliable safety protection
