

Diesel Engine Piston

This diesel engine piston is designed for optimal combustion and durability. It features precision-machined ring grooves for efficient sealing, and a reinforced piston head for enhanced thermal resistance.

Product Overview

High-Performance Diesel Engine Piston

Engineered for optimal combustion and durability, this diesel engine piston is designed to withstand extreme pressures and temperatures. It features a robust construction with precision-machined surfaces, including oil cooling galleries and optimized ring grooves for superior sealing and lubrication. Crafted from high-strength aluminum alloy, this component ensures efficient heat dissipation and extended service life in demanding engine environments.

Technical Specifications

Part Number	3017349
Material	High-strength aluminum alloy
Key Features	Oil cooling galleries, Precision-machined ring grooves, Reinforced piston head, Robust piston skirt

Compatibility & Applications

Compatible Equipment

- Buses
- Trucks
- Bulldozers
- Excavators
- Generators
- Tractors
- Marine engines
- Construction machinery
