

Diesel Engine Piston Kit for FL2011 Engines

This piston kit is designed for diesel engines, providing reliable performance and durability. It is engineered to withstand high combustion pressures and temperatures, ensuring efficient power delivery and long service life.

Product Overview

Engineered for FL2011 Performance

This diesel engine piston kit is designed specifically for FL2011 engines, ensuring reliable performance and durability under demanding conditions. Engineered to withstand high combustion pressures and temperatures, it promotes efficient power delivery and supports a long service life. The kit includes all essential components manufactured to meet precise OEM specifications, making it an ideal choice for engine rebuilds and maintenance.

Technical Specifications

Key Dimensions

94 mm

Diameter

51.67 mm

Compression Height

81.67 mm

Total Height

Piston Details

Feature	Value
Ring Count	4
Pin Size	26x65mm
Recess Diameter	43mm
Recess Depth	19.6mm

OEM Numbers

04280571, 04280572

Logistics

Weight per Unit

1.01 kgs

Place of Origin

Hebei, China
