

# Diesel Engine Water Pump

This diesel water pump is designed for efficient water transfer in various applications. It features a robust diesel engine, durable pump housing and impeller, and a sturdy frame for stability and portability.

## Overview

### High-Performance Diesel Water Pump

This robust diesel engine water pump is engineered for efficient water transfer across diverse industrial and agricultural applications. Featuring a durable pump housing and reliable engine model, it is designed to handle both clean and dirty water effectively. With impressive flow rates and suction capabilities, this unit is an ideal solution for irrigation, construction sites, and emergency water removal needs.

## Performance Metrics

### Flow Rate

**60 T/h**

Flow Rate

Total Lift	28 m
------------	------

Suction Lift	7 m
--------------	-----

## Technical Specifications

Engine Model	EXD178
--------------	--------

Inlet/Outlet Size	3 inch
-------------------	--------
