

Diesel Engine Water Pump

This self-priming diesel water pump is designed for efficient water transfer in agricultural and construction applications. It features a robust diesel engine for reliable performance and durability.

Product Overview

High-Performance Diesel Water Pump

This self-priming diesel water pump is engineered for heavy-duty water transfer tasks in both agricultural and construction environments. Built for reliability, it features a robust diesel engine encased in a protective roll cage to withstand demanding field conditions. It serves as an ideal solution for irrigation, drainage, and general water management needs.

Technical Specifications

Model	80DTP
Power Type	Diesel
Certifications	CE

Design & Build

Frame Design
Protective Roll Cage

Applications

Suitable Applications

- Agricultural Irrigation
- Construction Site Drainage
- General Water Transfer
