

Diesel Engine Water Pump for Irrigation

This diesel engine water pump provides a robust and efficient solution for agricultural drainage and irrigation. Designed for high performance and reliability, the engine-pump combination ensures consistent water flow.

Product Overview

High-Performance Irrigation Solution

This diesel engine-driven water pump is engineered for robust performance in agricultural irrigation and drainage applications. Designed to operate reliably in demanding environments, the system delivers consistent water flow essential for effective water management. Its durable construction ensures longevity, making it a dependable asset for various large-scale farming operations.

Technical Specifications

Key Performance Attributes

- High-performance engine coupling
- Consistent water flow delivery
- Durable construction for demanding environments
- Efficient power transmission

Engine Type	Diesel
Primary Applications	Agricultural Irrigation, Drainage, Water Management
