

Diesel Fired Infrared Space Heater

This diesel fired infrared heater provides focused warmth for large areas. It is designed with safety features and durable components for reliable performance in demanding environments.

Product Overview

High-Efficiency Infrared Heating

This diesel-fired infrared space heater is engineered for high-efficiency heating in demanding industrial and commercial environments. Featuring a robust stainless steel heating element and a corrosion-resistant powder-coated frame, it ensures long-term durability. With advanced safety systems including overheat protection and a flame-out sensor, this unit provides reliable, maintenance-free performance for workshops, garages, and construction sites.

Performance

Heat Output

21 kW

Heat Output

Fuel Consumption	1.71 kg/hr
Compatible Fuels	Heating Oil, Diesel, Kerosene

Technical Specifications

Fuel Tank Capacity	15 L
Power Supply	220V/50Hz - 115V/60Hz
Protection Class	IP 44

Features

Safety Systems

- Overheat cut-off
- Photocell flame sensor
- Fire back protection
- Self-failure diagnosis

Operational Highlights

- Automatic ignition
- Fully automatic PCB control
- Solenoid pump
- Danfoss nozzle
- Maintenance-free design

Compliance

Certifications

CE • TUV Rheinland • RoHS • CSA

Warranty

1 Year
