

Diesel Fuel Injection Nozzle for ISUZU Common Rail System

This diesel fuel injection nozzle is designed for ISUZU common rail systems. It optimizes fuel atomization and spray processes for enhanced engine performance and reduced emissions.

Overview

High-Precision Common Rail Nozzle

This diesel fuel injection nozzle is engineered for ISUZU common rail systems to ensure optimal fuel atomization and spray processes. By precisely controlling nozzle geometry, it significantly enhances engine performance and reduces emissions. Constructed from high-quality steel, it provides exceptional durability and reliable sealing for multi-cylinder diesel engines.

Technical Specifications

High-performance nozzle designed for optimal fuel atomization and engine efficiency.

Precision-engineered component for reliable fuel delivery in common rail systems.

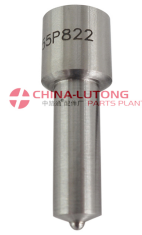

Unit Weight

0.04 kg
Net Weight

Body Material	Steel
Fuel Type	Diesel
Component	Auto Nozzle
Cylinder Configuration	Multi-cylinder

Compliance & Quality

DIESEL PARTS

Manufactured to meet stringent quality standards for durable performance.

Quality Certifications

ISO9001, TS16949, ISO 9001:2008

Warranty

6 Months
