

Diesel Fuel Injector 095000-6521

This diesel fuel injector is designed for optimal engine performance and fuel efficiency. It delivers precise fuel atomization, ensuring complete combustion and reduced emissions.

Product Overview

High-Performance Diesel Fuel Injection

The 095000-6521 is a high-performance diesel fuel injector engineered to deliver precise fuel atomization for optimal engine performance and efficiency. Designed for modern diesel engines, it ensures complete combustion and reduced emissions while providing improved throttle response. Its robust construction is built for long-lasting reliability and durability even under the most demanding operating conditions.

Technical Identification

Identification Codes

| Type | Reference Number |
|------------------------|------------------|
| Primary Part Number | 095000-6521 |
| Secondary Code | 57K00270 |
| Batch/Serial Reference | 518081273 |

Performance Features

Key Benefits

- Precise fuel atomization for complete combustion
- Enhanced fuel efficiency and reduced emissions
- Improved throttle response
- Robust construction for extended service life
- Consistent performance under demanding conditions

Application & Compatibility

Compatibility

Diesel Engines • Direct Replacement • Automobile Diesel Systems

Manufacturing Standards

Available Services

R&D Support, System Solutions, Drawing Design, After-Sales Service
