

Diesel Fuel Injector for Cummins Engines

This fuel injector is designed for use in Cummins diesel engines. It delivers fuel into the engine's combustion chamber, which is critical for engine performance and efficiency.

Overview

High-Precision Diesel Fuel Injectors

These unit injectors are engineered for heavy-duty diesel engines, providing optimal fuel atomization and efficient combustion. Designed to restore engine performance and improve fuel economy, they feature a robust metal body and integrated electronic control for precise delivery. Each unit is built for durability and longevity in demanding automotive applications.

Technical Specifications

Engine Compatibility

Cummins M11

Key Features

- High-pressure fuel delivery
- Precision-engineered nozzle
- Threaded connection for secure installation
- Complete rebuild components available

Injector Type	Unit Injector (Pump Nozzle)
Control System	Electronically Controlled

Compatibility Matrix

Comprehensive compatibility chart for M11 engine unit injectors and nozzle components.

Part Numbers & Nozzle Compatibility

Parts No.	Nozzle Model	Application
3087772	M11	M11 Engine
3084589	3084592	M11 Engine
3087557	3084592	M11 Engine
3095040	3095043	M11 Engine
3411752	3084592	M11 Engine
3411753	3095043	M11 Engine
3411754	3095729	M11 Engine
3411755	3095734	M11 Engine
3411756	3609925	M11 Engine
3411758	3411404	M11 Engine
4026222	4026225	M11 Engine
4061851	4061854	M11 Engine
4307776	4307779	M11 Engine
4384360	4384384	M11 Engine
4902921	4902924	M11 Engine
4903319	4903322	M11 Engine
4903472	4903475	M11 Engine
