

Diesel Fuel Injector Nozzle Replacement for Cummins Engines

This diesel injector nozzle is designed as a replacement part for Cummins engines. It ensures optimal fuel atomization and efficient combustion, leading to improved engine performance and reduced emissions.

Product Overview

Precision Diesel Fuel Injection

These replacement diesel fuel injector nozzles are engineered for optimal fuel atomization and efficient combustion in Cummins-compatible engines. Designed to meet rigorous industry standards, they provide a reliable alternative to original equipment, ensuring improved engine performance and enhanced fuel economy. Each unit is precision-engineered from high-quality steel to withstand the demands of heavy-duty diesel applications.

Technical Specifications

Material Composition	Steel
Weight	0.04 kg
Quality Certifications	ISO9001, TS16949

Compatibility Reference

Compatible Injector Nozzle References

Item Type	Reference Number	Stumping Number
Injector Nozzle	105007-1120	DN0PDN112
Injector Nozzle	093400-8220	DN0PDN121
Injector Nozzle	093400-5571	DN4PD57
Injector Nozzle	093400-5500	DLLA160P50
Injector Nozzle	0 434 250 063	DN0SD193
Injector Nozzle	0 433 271 376	DLLA149S774
