

Diesel Fuel Treatment for Improved Engine Performance

This concentrated diesel fuel treatment enhances overall engine performance and fuel efficiency. It effectively cleans injectors, reduces harmful emissions, and provides robust protection against corrosion.

Product Overview

High-Performance Diesel Fuel Treatment

This concentrated diesel fuel treatment is engineered to restore engine performance and optimize fuel efficiency. By effectively cleaning injectors and reducing harmful emissions, it helps eliminate engine hesitation, knocking, and rough idling. It is suitable for all diesel engines, providing essential protection against corrosion and ensuring smoother acceleration.

Technical Specifications

Volume	354 ml
Volume (US)	12 fl oz
Treats Up To	25 gallons
Product Code	M-4435

Performance Benefits

Issues Resolved

- Engine Hesitation
- Engine Knocking
- Rough Idling

Primary Benefits

Improves Fuel Economy, Cleans Injectors, Reduces Emissions, Prevents Corrosion, Improves Idling
