Product Overview

Industrial Rental Power Solution

This diesel generator is specifically engineered for demanding rental applications, including mining sites and remote industrial operations. It features an advanced ambient temperature and airflow design that supports both 100% prime and 110% emergency standby power requirements. The unit is built for durability and convenience, incorporating a fully bunded base tank to prevent spills and a high-quality outdoor powder coating for superior corrosion resistance.

Key Features

Construction & Mobility

Top lifting points, Forklift pockets, Lockable fuel inlet, External power outlet flap, Holistic disassembly canopy

Safety & Environment

Operational Safety

Fully bunded fuel tank, Earth strap fitted on doors, Anti-corrosion coating, UV radiation protection

Technical Components

Core Components

Component	Supported Brands/Details
Engine Manufacturer	Perkins
Available Alternators	Mecc Alte, Stamford, Leroy Somer

Performance Specifications

Noise Control

Customized built-in high performance residential muffler for noise reduction
