

Diesel Generator SDG5000SE

The SDG5000SE is a robust diesel generator designed for reliable power generation. It features a durable construction and a comprehensive control panel with versatile power options, and is mounted on wheels for easy portability.

Overview

Reliable Power Solution

The SDG5000SE is a robust diesel-powered generator designed for high-performance energy delivery in demanding environments. Featuring a 4-stroke, air-cooled engine, it provides dependable power for emergency backup or continuous use in remote locations. Its silent operation and portable design, complete with integrated wheels, ensure it remains both user-friendly and unobtrusive during operation.

Performance

Power Output

5000 W

Max Output

4500 W

Rated Output

Technical Specifications

Engine Specifications

Feature	Detail
Engine Displacement	389cc
Engine Type	4-Stroke, Single Cylinder
Cooling System	Air cooled
Fuel Type	Diesel

Operating Characteristics

- Electric starting mechanism
- 15L fuel tank capacity
- 71dB(A) noise level at 7m
- Direct injection system

Features

Control & Safety

AC Voltmeter, AC Breaker, DC Breaker, DC 12V Output, Oil Alert
