

Diesel Generator Set, 20 kVA to 2500 kVA

This diesel generator set provides a reliable power solution for various applications. It is designed for continuous operation and provides stable power output.

Overview

Professional Diesel Power Solutions

This diesel generator set offers a versatile power range from 20 kVA to 2500 kVA, suitable for both prime and standby applications. Engineered for reliability, the system features a robust brushless alternator design and is available in various configurations, including silent, low-noise, and mobile trailer-mounted options. With over two decades of manufacturing expertise, these units are built to meet demanding emergency power requirements efficiently.

Technical Specifications

Genset Power Range

15 kVA

Minimum Power

3000 kVA

Maximum Power

Alternator Power Range

6.5 kW

Min Output

1760 kW

Max Output

Alternator Type

3-Phase Brushless

Configuration & Options

Available Configurations

Silent, Low Noise, Sound-proof, Mobile, Trailer-mounted

Compliance & Warranty

Certifications

CE • ISO • CQC

Warranty Terms

Component	Duration	Hours
General	1 Year	1000
Alternator Part	15 Months	1200
