Overview

Reliable Power Generation

This diesel generator set offers a versatile power range from 200 to 3000kVA, designed to meet demanding industrial, commercial, and emergency backup power needs. Built for stability and performance, the unit features a robust engine coupled with a high-performance brushless alternator to ensure consistent output. With options for silent, low-noise, and mobile configurations, this equipment is engineered for longevity and operational efficiency in diverse environments.

Technical Specifications

Genset Power Range

15 kVA

Minimum Power

3000 kVA

Maximum Power

Alternator Power Range

6.5 kW

Min Output

1760 kW

Max Output

Alternator Type

3 Phase Brushless

Compliance and Quality

Warranty Coverage

Component	Duration	Usage Limit
General Unit	1 Year	1,000 Hours
Alternator Part	15 Months	1,200 Hours

Certifications

CE, ISO, CQC

Configuration Options

Available Configurations

Silent • Low Noise • Sound-proof • Mobile • Trailer
