

Diesel Generator Set, 22-120kW

This diesel generating set provides power coverage from 22kW to 120kW. It adopts a diesel engine made by a Sino-Germany joint venture.

Overview

Reliable Power Generation

This diesel generator set offers a versatile power range from 22kW to 120kW, designed to provide consistent electrical output for various applications. Built with a proven, high-performance diesel engine series, the unit is engineered for durability and efficiency in demanding environments. It is suitable for both prime and standby power needs, featuring a robust design that ensures long-lasting operation.

Technical Specifications

Power Range

22 kW

Minimum Power

120 kW

Maximum Power

Engine Series

226B Series

Construction & Design

Key Design Features

- Heavy-duty steel base frame
- Integrated vibration isolators
- Advanced control panel for monitoring
- Compact and transportable design

Application Suitability

Prime Power, Standby Power, Mechanical Fields, Marine Fields
