

Diesel Generator Set, 4.5 kVA Rated Output, 230V

This diesel generator set provides a rated output of 4.5 kVA at 230V. It features a single-cylinder, four-stroke direct injection engine and delivers reliable power for various applications.

Overview

Reliable Power Solution

This diesel generator set is engineered for consistent performance in industrial and commercial applications. Featuring a robust design and user-friendly controls, it provides a stable power supply for various operational needs. Its compact construction ensures durability and efficiency, making it a dependable choice for backup or primary power requirements.
