

Diesel Generator Set

This diesel generator set provides a reliable power solution for various applications. It features efficient fuel consumption, low noise operation, and advanced control systems for easy monitoring.

Overview

Reliable Power Solution

This diesel generator set is engineered to provide consistent and dependable power across a range of output capacities. Featuring advanced engine technology, the unit is designed for efficient fuel consumption and low-noise operation, making it suitable for diverse industrial, commercial, and residential environments. Its compact build and integrated control systems ensure ease of use and stable electricity supply when you need it most.

Performance

Output Capacity

6 kVA

Minimum Output

30 kVA

Maximum Output

Series & Models

Model Variants

- J310
- GL9000
- KJ-T300
- SQ-3300

Available Series

J Series, GL Series, KJ Series, SQ Series, Lowboy Super Quiet

Features

Key Features

Low Noise Operation • Efficient Fuel Consumption • Compact Design • Advanced Control System
