

Diesel Generator Set

This diesel generator set is engineered for reliable power generation. It features a robust diesel engine coupled with a high-efficiency alternator, providing a stable power output.

Overview

High-Performance Diesel Generator Set

This industrial-grade diesel generator set is engineered for high reliability, long operating cycles, and cost-effective maintenance. It features a four-stroke engine with advanced turbocharging and water-cooling systems, ensuring stable performance under demanding conditions. Designed with environmental consciousness in mind, the unit offers low-emission operation and energy-saving capabilities, making it suitable for both prime and standby power applications.

Technical Specifications

Rated Speed	1500 rpm
Cooling System	Water cooling with fan
Engine Type	Four-stroke, turbo-charged
Compliance Standards	ISO3046

Performance Features

Operational Advantages

- Excellent damping performance via computer-simulated dynamic damping system
- Advanced control system for reliable monitoring
- Low-noise operation with customized muffler exhaust system
- High fuel and oil efficiency
- Long overhaul intervals

Environmental Profile

Low-emission • Energy-saving
