Overview

Industrial Power Solutions

This inventory includes a comprehensive selection of high-performance diesel engines and integrated generator sets suitable for demanding marine and industrial applications. These units are engineered for robust power generation and reliability, featuring multi-cylinder configurations and durable metal construction. With a wide range of output capacities and legacy configurations, these units provide flexible solutions for varied power requirements.

Technical Standards

Common Operating Metrics

60 Hz

Standard Frequency

720 RPM

Typical Operating Speed

450 V

Standard Voltage

Equipment Types

Diesel Generator Set, Diesel Engine

Inventory Summary

Stock Specifications Overview

Model	Output Power	Frequency	Year
DAIHATSU 6DS-26A	1320PS	60Hz	1981
DAIHATSU 6DL-26	1500PS	60Hz	1987
DAIHATSU 8DK-32	2500KW	60Hz	1988
YANMAR 6T260L-EX	1500PS	60Hz	1990
MAN B&W 6L23/30H	810KW	50Hz	2008
