

# Diesel Generator with Direct Injection

This diesel generator is engineered for dependable power generation. It features direct injection for efficient fuel consumption and includes an engine switch, fuse protection, and AC/DC breakers for safe operation.

## Product Overview

### High-Performance Diesel Power

This robust diesel generator utilizes advanced direct injection technology to provide efficient fuel consumption and reliable power output. Designed for demanding applications, it features a 389cc 4-stroke engine capable of delivering up to 5500W of maximum power. The unit is equipped with comprehensive safety features, including fuse protection and dedicated breakers for both AC and DC outputs, ensuring stable and controlled operation.

## Technical Specifications

### Maximum Output

**5500 W**

Maximum Output

### Rated Output

**5000 W**

Rated Output

## Engine Details

### Engine Configuration

- 389cc Displacement
- 4-Stroke
- Single Cylinder
- Direct Injection
- Air Cooled

## Operational Features

Starting Method	Recoil Start, Electric Start
Fuel Tank Capacity	15 L
Noise Level	85 dB(A)
Power Outputs	AC Output, DC 12V Output
