

Diesel Generator with Direct Injection

This diesel generator is engineered for dependable power, utilizing direct injection for efficient fuel use and lower emissions. It includes safety features like an oil alert and circuit breakers, plus a voltmeter and standard outlets.

Product Overview

Reliable Diesel Power Solution

This diesel generator features advanced direct injection technology, providing a balance of fuel efficiency and consistent performance. Engineered with a 459cc 4-stroke engine, it offers both recoil and electric starting options for ease of use. With a sturdy frame and integrated wheels, it is designed for durability and portability in demanding environments.

Technical Specifications

Engine Configuration

- 459cc Displacement
- 4-Stroke
- Single Cylinder
- Direct Injection
- Air Cooled

Fuel Tank Capacity 15 L

Noise Level @ 7m 85 dB(A)

Operation

Starting System Recoil, Electric
