

# Diesel Generator with Direct Injection

This diesel generator is designed for reliable power generation. It features direct injection technology for efficient fuel combustion and enhanced performance.

## Overview

### Reliable Power Generation

This diesel generator features advanced direct injection technology, providing efficient fuel combustion and consistent power delivery. Designed for versatility, it offers both recoil and electric starting options for ease of use. With a sturdy frame and integrated wheels, it is built to provide a dependable power source for demanding professional applications.

## Performance Metrics

### Power Output

**6500 W**

Max Output

**6000 W**

Rated Output

## Technical Specifications

### Engine Specifications

- 459cc displacement
- 4-Stroke engine
- Single cylinder
- Direct Injection technology
- Air cooled

### Fuel Tank Capacity

15 L

## Operational Features

### Starting System

Recoil Start, Electric Start

### Noise Level

85 dB(A)

## Control & Safety

### Control Panel Features

- AC Voltmeter
- AC Breaker
- DC Breaker
- DC 12V 8.3A Output
- Engine Switch
- Fuse Protection
- Fuel Cock
