

Diesel Generator with Direct Injection

This diesel generator provides a reliable power source with its robust design. Direct injection technology ensures efficient fuel consumption and consistent performance.

Overview

High-Performance Diesel Power

This robust diesel generator utilizes direct injection technology to deliver efficient fuel consumption and consistent power output for demanding professional applications. Built with a durable frame and integrated wheels, it is designed for easy transport and reliable performance in various environments. The unit includes comprehensive safety systems, such as oil alert sensors and integrated circuit breakers for both AC and DC power outputs.

Engine Specifications

Engine Details

Feature	Specification
Displacement	459cc
Type	4-Stroke, Single Cylinder
Cooling	Air Cooled
Injection	Direct Injection

Operations

Starting Methods	Recoil, Electric
Fuel Tank Capacity	15 L
Noise Level	85 dB(A)

Features

Key Features

- Oil alert system
- AC and DC circuit breakers
- AC voltmeter
- 12V DC battery charging output
- Heavy-duty frame with transport wheels
