

Diesel Generator with Electric Start

This diesel generator is engineered for dependable power generation. It features robust construction and includes safety features like oil alert and AC/DC breakers.

Overview

Professional Diesel Power Solution

This diesel generator provides a reliable power source for professional applications, delivering a maximum output of 5000W. Designed with durability in mind, the 389cc 4-stroke single-cylinder engine features air cooling and direct injection for consistent performance. It includes essential safety features like oil alert systems and built-in AC/DC breakers, ensuring stable power delivery for sensitive equipment.

Performance Metrics

Power Output

5000 W
Max Output

4500 W
Rated Output

Noise Level

71 dB(A)

Engine Specifications

Parameter	Value
Displacement	389cc
Type	4-Stroke, Single cylinder
Cooling	Air cooled
Fuel Type	Diesel

Fuel Tank Capacity

15 L

Operational Features

Starting Method

Electric Start

Safety Features

Oil Alert, AC Breaker, DC Breaker, Fuse Protection

Auxiliary Power

DC 12V output
