

Diesel Hydraulic Shunting Locomotive

This diesel-hydraulic locomotive is engineered for shunting and various industrial tasks. Its hydraulic transmission ensures efficient power delivery in demanding mining and industrial settings.

Overview

Industrial Shunting Locomotive

This diesel-hydraulic shunting locomotive is engineered for heavy-duty operations in demanding industrial and mining environments. Featuring a robust design with a reliable hydraulic transmission system, it provides efficient power transfer for precise maneuvering and shunting tasks. Its durable construction ensures consistent performance in complex logistics and material handling scenarios.

Technical Specifications

Model Designation	GK1L
Transmission System	Diesel-Hydraulic
Primary Application	Mining, Industrial, Shunting

Performance Metrics

Operational Highlights
