

Diesel Internal Combustion Engine with Turbocharger

This is a diesel internal combustion engine equipped with a turbocharger. It is designed for use in various machinery and industrial applications.

Product Overview

High-Performance Diesel Engine

This industrial-grade internal combustion engine is engineered for reliability and power in demanding machinery applications. Featuring an integrated turbocharger for enhanced efficiency and performance, this unit is built with a robust cast iron engine block to withstand rigorous operating conditions. It comes fully equipped with essential components including fuel filtration systems and an integrated flywheel housing, making it a versatile solution for various industrial power requirements.

Technical Specifications

Induction System

Turbocharged

Engine Type

Diesel Internal Combustion

Block Material

Cast Iron

Key Components

Included Components

- Turbocharger
- Fuel filters
- Integrated flywheel housing
- Cooling fan
