

Diesel Portable Screw Air Compressor 13 m3/min 17 bar

This diesel-driven screw air compressor delivers air at 13 m3/min with a working pressure of 17 bar. It is designed for use in demanding applications and all weather conditions.

Overview

High-Performance Portable Air Compression

This diesel-driven screw air compressor is engineered for demanding industrial applications, including construction and mining. It offers a robust capacity of 13 m³/min at a working pressure of 17 bar, ensuring consistent power for heavy-duty tools. Designed for versatility, the unit operates efficiently in extreme weather conditions ranging from -25°C to +50°C.

Performance Metrics

Air Capacity

13 m³/min
Air Capacity

17 bar
Working Pressure

Pressure (PSI)

246 psi

Technical Specifications

Engine Type

Cummins

Emission Standards

COM 2 Compliant, COM 3 Compliant

Operational Features

Maintenance & Design

- Extended service intervals
- Compact dimensions
- Lightweight construction
- Rugged, durable build

Key Advantages

Easy Transport • Low Total Cost of Ownership • All-Weather Ready • Simple Operation

Operating Temperature

-25°C to +50°C
