

Diesel Power Generator

This diesel generator provides a reliable power supply for various applications. It features a durable frame, multiple power outlets, a control panel, a fuel tank, and a powerful diesel engine.

Product Overview

Reliable Power Generation

The AG-HA-9000 is a robust diesel generator engineered for consistent and reliable power supply across diverse environments. Designed with a durable protective frame, this unit offers both stability and portability, making it suitable for industrial, commercial, and residential applications. It features a powerful diesel engine, an integrated control panel for easy monitoring, and a substantial fuel tank designed for extended operation.

Technical Specifications

Model Number	AG-HA-9000
Engine Type	Diesel

Features

Key Features

- Durable protective frame
- Extended operation fuel tank
- Integrated control panel with indicators
- Multiple power output connections

Applications

Suitable Applications	Industrial, Commercial, Residential
