General Information

Professional Diesel Power Generator Sets

These professional diesel generator sets offer a power range from 9.6 to 2475 KVA, engineered for stability, durability, and reliable performance. Designed with versatility in mind, they serve a wide variety of applications including industrial, communication, outdoor engineering, mining, and military sectors. Built for efficiency, these units are recognized for their energy-saving capabilities, ease of maintenance, and compliance with global quality standards for long-term operational reliability.

Certifications & Compliance

CE, ISO 9001:2015, ISO 3046, GB/T 2820, ISO 8528

Technical Specifications

Key Operational Metrics

50 Hz

Operating Frequency

400 V

Rated Voltage (Line to Line)

230 V

Rated Voltage (Line to Neutral)

Voltage Options

- 240/415V
- 220/380V
- 127/220V

Ambient Reference Conditions

- 1,000mbar pressure
- 40 degree Celsius
- 30% relative humidity

Power Range

9.6 to 2475 KVA

Product Features

Key Benefits

Small & Lightweight • High Efficiency • Environmentally Friendly • Easy Maintenance • Water-Cooled • High Stability
