Overview

Professional Power Solutions

This diesel generator set is engineered for reliability in both continuous and standby power applications. The unit features a robust, soundproof enclosure designed for weather protection and noise reduction, making it suitable for diverse industrial, commercial, and residential environments. Equipped with an intuitive digital control panel, operators can easily monitor critical parameters such as voltage, current, and frequency to ensure optimal performance.

Key Features

Safety Protections

- Automatic low oil pressure shutdown
- High coolant temperature protection
- Over-speed protection
- Emergency stop button

Available Series

GF Series (Diesel), GFS Series (Soundproof), SD/SDC Series (Welding Dual-Use)

Technical Specifications

Control Panel Metrics

50 Hz

Frequency

Design & Build

Feature	Description
Enclosure	Robust soundproof/weatherproof
Mounting	Heavy-duty base frame
Maintenance	Strategically placed service doors
Transportation	Integrated lifting points
