

Diesel Power Generator Set

This diesel generator provides a robust and reliable power generation solution for industrial and commercial use. It features a diesel engine, high-efficiency alternator, and comprehensive control panel for monitoring and protection.

Overview

Industrial Diesel Generator Sets

These professional-grade diesel generator sets are engineered to provide reliable power solutions ranging from 8KVA to 3250KVA. Built to support diverse industrial and commercial applications, each unit integrates high-quality international engine and alternator components for consistent performance. The system is mounted on a heavy-duty steel base frame designed to ensure operational stability and minimize vibration during use.

Performance Metrics

Power Output Range

8 KVA

Minimum Capacity

3250 KVA

Maximum Capacity

Features

Available Services

Unit Installation, Automatic Distribution, Environmental Engineering, Unit Maintenance, Spare Parts Supply

Construction

Construction Highlights

- Heavy-duty steel base frame
- Vibration-dampening design
- High-efficiency alternator
- Comprehensive control panel for engine and electrical monitoring
