

Diesel Power Generator Set

This diesel generating set provides reliable power for various applications. It features a robust engine and high-efficiency alternator for stable and consistent power output.

Overview

Reliable Power Generation Solution

This diesel generating set is engineered for high reliability and consistent power output, featuring a robust four-stroke engine design. Optimized with advanced damping systems and a specialized muffler exhaust, it delivers excellent operational stability with minimal vibration and noise. Designed for efficiency, the unit emphasizes low fuel and oil consumption, ensuring a long operational life and extended maintenance intervals for critical industrial and commercial applications.

Technical Specifications

Rated Speed	1500 rpm
Engine Configuration	Four-stroke, Water-cooled, Turbocharged

Performance Features

Key Operational Benefits

- Excellent damping performance via computer-simulated dynamic systems
- Advanced monitoring and control strategy
- Low-noise operation with customized muffler exhaust
- Environmental protection with low-emission design
- High fuel and oil efficiency

Standards & Compliance

Regulatory Standards

ISO 3046
