

Diesel Power Generator Sets

The X6170Z/8170Z series land generating sets are designed for reliable power generation in various applications. These diesel generator sets are engineered with robust construction and high-performance components to ensure durability and efficient operation.

Product Overview

Industrial Power Generation

The X6170Z/8170Z Series Land Generating Sets provide reliable and robust power solutions for industrial, commercial, and residential applications. Engineered for high performance, these sets feature precision-coupled alternators and advanced control systems for both continuous and standby power needs. The units are built to meet rigorous manufacturing and inspection standards, ensuring stability and long-term durability in demanding environments.

Technical Specifications

Power Output Range

300 kw Minimum Power	600 kw Maximum Power
--------------------------------	--------------------------------

Rated Operating Speeds	1000 rpm, 1500 rpm
Manufacturing Standard	GBT2820-1997

Component Details

Compatible Alternator Brands

- Stamford
- Marathon
- Lanzhou

Installation Options

For integral genset configurations, the control panel is mounted directly on the generator base through a shock absorber. For separated genset configurations, the control panel is packed separately for customized installation.

Optional Equipment

Available Upgrades

Automatic Start • ATS • Remote Control • Silencing Type • Trailer Type • Air Filter
