Overview

Robust Soil Cultivation Solution

This diesel power tiller is a robust and efficient machine designed for professional soil preparation and cultivation. Powered by a reliable diesel engine, it delivers high torque and fuel efficiency, making it ideal for demanding agricultural tasks on small to medium-sized farms. With adjustable tilling depth and width, this machine offers versatile performance across various soil conditions and crop types.

Technical Specifications

Engine Model	186FD Diesel Engine
Drive System	Gear Drive
Model Identifier	CBSDPT1350

Key Features

Performance Highlights

1 Diesel
Engine Type

1 Gear
Transmission

Operational Features

- Adjustable tilling depth
- Adjustable tilling width
- Ergonomic handle and controls
- Adjustable handlebars
- Compact design for maneuverability

Suitable Applications

Small Farms, Medium Farms, Gardening, Landscaping, Soil Aeration
