

# Diesel Powered 2500 PSI Pressure Washer

This diesel pressure washer delivers a high-pressure output of 2500 PSI at 4.5 GPM. The durable frame and pneumatic tires provide easy maneuverability across various terrains.

## Product Overview

### Heavy-Duty Diesel Performance

The CJC-1108B is a robust diesel-powered pressure washer engineered for demanding industrial, commercial, and agricultural cleaning tasks. Powered by a reliable air-cooled diesel engine, this unit delivers consistent high-pressure output to tackle stubborn dirt and grime effectively. Its durable construction and pneumatic tires ensure it remains maneuverable and ready for use across various challenging terrains.

## Performance Metrics

### Rated Pressure

**2500 PSI**  
Pressure

### Flow Rate

**4.5 GPM**  
Water Flow

## Technical Specifications

Engine Type	Air-cooled diesel engine
Model Number	CJC-1108B

## Design & Build

### Mobility

- Durable frame
- Pneumatic tires for various terrains

## Applications

Recommended Use Cases	Industrial, Commercial, Agricultural
