Overview

Rugged Diesel Cargo Transport

This diesel-powered cargo tricycle is engineered for heavy-duty transport in demanding environments. Featuring a robust 18Hp engine and a 2-ton loading capacity, it excels in off-road conditions thanks to its high ground clearance and durable construction. Designed for efficiency and ease of maintenance, it offers an economical fuel consumption rate, making it an ideal solution for agricultural, construction, and logistics operations.

Performance Highlights

18 Hp

Engine Power

2000 kg

Loading Capacity

40 km/h

Max Speed

2.8 L/100km

Fuel Consumption

Technical Specifications

Engine & Drivetrain

Feature	Specification
Engine Model	ZS1105
Cooling System	Water Cooling
Starting Method	Electric Start
Transmission	3+1 Belt Gearbox
Steering	Steering Wheel

Dimensions & Weight

- Overall Dimensions: 3820 x 1580 x 1810 mm
- Cargo Body Dimensions: 2165 x 1400 x 400 mm
- Total Weight: 1720 kg
- Wheelbase: 2600 mm
- Tread: 1180 mm
- Ground Clearance: 160 mm

Chassis and Safety

Tyre Configuration

Position	Size
Front Tyre	500-16
Rear Tyre	650-16

Safety & Control

Hydraulic Brake, 5m Braking Distance, 7m Turning Diameter
