

Diesel Powered High Pressure Washer

This is a heavy-duty diesel-powered pressure washer designed for demanding cleaning applications. It delivers high pressure and flow rates for efficient removal of dirt, grime, and other stubborn residues.

Overview

Heavy-Duty Cleaning Performance

The CJC-1108A is a robust, diesel-powered pressure washer engineered for demanding industrial and commercial cleaning applications. Equipped with a powerful 8.5HP air-cooled diesel engine, it delivers consistent high-pressure performance to tackle stubborn dirt, grime, and debris. Its durable construction ensures reliability in rigorous environments, making it an ideal choice for professional cleaning tasks.
