

Diesel Powered Industrial Tractor

This heavy-duty diesel tractor is designed for towing and pushing applications in industrial and construction environments. It features a robust chassis, powerful diesel engine, and hydraulic systems for efficient operation.

Overview

Industrial Towing Solution

This heavy-duty diesel tractor is engineered for demanding towing and pushing applications within industrial and construction environments. Built with a robust chassis and powerful diesel engine, it ensures reliable performance when moving heavy loads. The design prioritizes operator efficiency and safety, featuring a fully enclosed cabin for comfort during extended operation.

Technical Specifications

Key Features

- Robust chassis construction
- Hydraulic systems for efficient operation
- Fully enclosed operator cabin
- High towing capacity

Available Models	QD60, QD80
Power Source	Diesel Engine

Performance Metrics

Performance Highlights

60 Tons

QD60 Capacity Class

80 Tons

QD80 Capacity Class
