

Diesel-Powered Passenger Locomotive

This diesel locomotive is designed for passenger railway transport. It features a streamlined design and is capable of pulling multiple passenger cars.

Overview

Professional Passenger Locomotive

The SDD3 diesel-powered locomotive is a robust solution engineered specifically for high-efficiency passenger transport. Featuring a streamlined, aerodynamic aesthetic with a distinctive blue and red color scheme, it is designed for reliable performance in transit operations. This locomotive is fully equipped to handle multiple passenger cars, ensuring safe and consistent service for railway network operators.

Technical Specifications

Model Identifier	SDD3-0401
Certifications	TN -VR 200
Power Source	Diesel Engine

Performance

Primary Function

Passenger Transport
