Product Overview

High-Performance Diesel Rotary Tiller

This powerful diesel-powered rotary tiller is engineered for demanding agricultural tasks, featuring a robust 9Hp engine and a durable, thickened cast-iron transmission housing. Designed for versatility and operator comfort, it offers fully adjustable handlebars and a direct transmission system that maximizes efficiency during rotary tillage, ditching, and weeding. With added safety features like an emergency stop device and integrated lighting for night work, this machine is a reliable partner for efficient soil cultivation.

Engine & Performance

Engine Power

9 Hp

Horsepower

418 cc

Displacement

Air Filtration System

2-stage oil-bathing air filter

Transmission Type

Direct transmission

Construction & Design

Patented Design Elements

- Handlebar system
- Engine cover
- Guard plate

Tilling Width

1350 mm

Key Materials

Thickened cast-iron lower box, Special durable blades

Operational Features

Comfort Features

- Internal tooth anti-vibration handle glue
- Ergonomic design

Safety & Utility

Emergency stop device • Integrated night-work lamps • Rotary tillage • Ditching • Weeding

Handlebar Adjustability

Adjustable in direction of up/down and left/right
