

Diesel Powered S-Tube Concrete Pump

This is a diesel-powered concrete pump with S-tube technology. Its trailing design allows easy maneuvering on various construction sites.

Overview

High-Efficiency Concrete Pumping Solution

The Diesel Powered S-Tube Concrete Pump is engineered for reliable and efficient concrete transfer on demanding construction sites. Featuring advanced S-tube technology, this equipment ensures smooth flow and minimal maintenance. Its robust, trailing design provides excellent maneuverability, making it an ideal choice for diverse industrial and residential construction applications.

Technical Specifications

Power Source	Diesel Engine
Transfer Technology	S-tube technology
Mobility	Trailing

Key Features

Application Suitability

- Construction site concrete transfer
- Versatile concrete pumping applications

Key Benefits

High Efficiency, Robust Construction, Easy Maneuverability, Durability
