

Diesel Powered Water Pump

This diesel water pump is engineered for efficient and reliable water transfer in a variety of demanding applications. Its robust diesel engine and durable construction ensure long-lasting performance.

DIESEL WATER PUMP	
Engine Model	TD300
Capacity per Hour (L/min)	100
Discharge Port Diameter (mm)	75
Max Suction Head (m)	8
Total Head (m)	26
Max Flow Rate (L/min)	600
Starting System	Manual/Electric start
Bore x Stroke (mm)	70 x 55
Engine Speed (rpm)	3600
Continuous Output (KW)	2.98
Maximum Output (KW)	3.36

Overview

Robust Diesel Water Pump

This diesel-powered water pump is a reliable solution designed for high-volume water transfer in demanding environments. Built for durability and efficiency, it is ideal for irrigation, construction sites, and emergency water removal tasks. The unit features a sturdy frame for portability and stability, ensuring consistent performance in diverse industrial and agricultural applications.

Engine Performance

Engine Speed	3600 rpm
Continuous Output	2.98 KW
Maximum Output	3.36 KW
Cooling System	Force air-cooled
Bore x Stroke	70 x 55 mm

Hydraulic Specifications

Key Performance Metrics

600 L/min
Max Flow Rate

26 m
Total Head

8 m
Max Suction Head

Port Diameters

Port Type	Diameter
Suction Port	50
Discharge Port	50

Operation

Starting Mechanism

Recoil start, Electric start

Origin

Place of Origin

Changzhou, China
