

Diesel Powered Water Pump

This diesel water pump is designed for efficient water transfer in diverse settings. It features a durable frame and self-priming capability for quick start-up and consistent performance.

Product Overview

High-Performance Diesel Water Pump

This high-performance diesel water pump is engineered for efficient water transfer across various demanding applications, including irrigation, construction sites, and emergency water removal. Designed with a robust diesel engine, it ensures reliable, long-term operation. The unit features a durable frame for enhanced protection and portability, while its self-priming capability allows for quick and efficient start-ups.

Performance Metrics

Flow Rate

50 T/h

Flow Rate

Max Lift 25 m

Suction Depth 7 m

Technical Specifications

Engine Model ND168

Pump Size 3 inch

Application Suitability

Ideal Applications Irrigation, Construction, Emergency Water Removal
