

Diesel Powered Welding Generator

This diesel welding generator provides both power generation and welding capabilities. The unit is designed for use in construction sites, farms, and other locations where mobile power and welding are needed.

Overview

High-Performance Diesel Welding Generator

This robust diesel-powered welding generator is engineered for versatility, serving as both a reliable power source and a capable welding unit. Designed with a silent operation profile, it is ideal for residential use, construction sites, and agricultural applications where noise reduction is critical. Its portable, wheel-mounted design ensures mobility, while the high-quality aluminum alternator provides consistent performance for demanding tasks.

Technical Specifications

Power Output

1.8 kW

Minimum Power

4 kW

Maximum Power

Noise Level

Low Noise • Silent Type

Alternator Material

100% Aluminum

Features & Options

Optional Features

- Remote Control
- Automatic Transfer Switch (ATS)
- Digital Controller

Ideal Applications

Home Use, Construction, Agriculture, Mobile Power
